

HOHS Business Education

HTML

Dale Fisher and Chris Pendleton

Course Description

This class will teach students how to design and create web pages using HTML (Hyper-Text Markup Language) coding. Desirable layouts, images, links, tables, and other appropriate Web concepts will be covered. The curriculum for this course can be found at:

<http://www.mcli.dist.maricopa.edu/tut/index.html>

Supplies

Students must come prepared for class everyday with: **pen or pencil** and **paper**.

Grading

All course work will be assigned points. At the end of each grading period, accumulated points will be given a grade based on the following percentages: **A=90-100%**, **B=80-89%**, **C=70-79%**, **D=60-69%**.

The final exam will count for 15% of the trimester grade. Each student is required to take the final exam. If a student misses the final exam, they will receive an "I" on their report card.

Attendance and Participation

Student participation is an integral part of the learning process and is dependent on classroom attendance as there is great benefit from interaction with teachers and peers. It is difficult, if not impossible, to duplicate the experiences missed because of an absence. Presence in class provides students the opportunity to ask questions about material not understood, to receive assignments straight from the teacher, to make presentations before classroom audiences and to participate in group learning activities.

Flex Plan for TAG Students

Students are assessed in a number of ways in this course including tests, quizzes, daily assignments and projects. Based on these assessments, necessary modifications to better meet the TAG students' educational needs may include a combination of the following: independent study of course text, advanced projects and advanced student store responsibilities.

****No student may use the internet without teacher permission. Students using the internet without permission will receive an "F" grade and be removed from class. NO EXCEPTIONS!**
